

SNF – Sustainable Development

REPORT

SNF FLOERGER®

Sustainable Development Policy

SNF S.A.S.

SNF's mission is to develop, produce and market polymers for water treatment, enhanced oil recovery, paper and mining industries, while respecting the environment and the satisfaction of our customers.

These products widely contribute to control water pollution and water recycling in our everyday life.

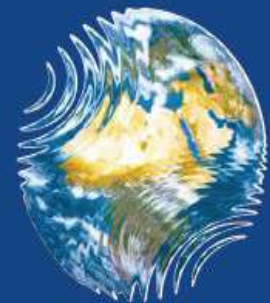

SNF has implemented an environmental process following these principles:

- The sustained development guaranteeing a long-term stability between environment, business and social well-being,
- The evaluation of the environmental impact before any construction of a manufacturing unit,
- The permanent improvement of the environmental performances including neighbourhood relationship and a maximum prevention of nuisances,
- The implementation and improvement of the methods of production whose environmental impact are as low as it is reasonably possible,
- Training and information of all our employees on environmental issues,
- The development and actualization of emergency plans, when risks remain,
- The recycling, the reduction of residual waste and their treatment under controlled conditions,
- Involving all the personnel, and especially the management, to favour activities respectful of the environment and of the legislation,
- A transparent communication and co-operation with all the local bodies and public authorities.
- SNF has joined the United Nations's initiative Global Compact. It is a principle based framework for businesses, stating ten principles in the areas of human rights, labour, the environment and anti-corruption.

With this commitment, SNF fulfils the current and future obligations and expectations of a modern industrial company.
